Acknowledgement

It gives us a great sense of pleasure to present the synopsis of the B.Tech mini project undertaken during B.Tech III Year. This project is going to be an acknowledgement to the inspiration, drive and technical assistance will be contributed to it by many individuals. We owe special debt of gratitude to **Mr. Bhanu kapoor, Technical Trainer**, for providing us with an encouraging platform to develop this project, which thus helped us in shaping our abilities towards a constructive goal and for his constant support and guidance to our work.

His sincerity, thoroughness and perseverance has been a constant source of inspiration for us. We believe that he will shower us with all his extensively experienced ideas and insightful comments at different stages of the project & also taught us about the latest industry-oriented technologies. We also do not like to miss the opportunity to acknowledge the contribution of all faculty members of the department for their kind guidance and co-operation.

ABSTRACT

We practice the platform it needs to attract those who are looking for a provider like you. Whether it is a patient, a loved one, or a referring physician, our goal at MentDeck is to build a custom website that appeals to the auWeb Design for Psychology and Psychiatry Practices. As a mental health professional, you spend each day working with individuals on a deeply personal basis. Many turn to the Internet to find a provider, whether a psychiatrist, psychologist, or counseling program. A well-designed mental health website can give your audience you are speaking to.

We can build a mental health site that conveys hope and optimism for the road ahead. Each component of your site – from the beautiful graphics display to the user-friendly layout – is created with the intention of building your brand and spotlighting the services and techniques that set you apart.

INTRODUCTION

Mental health is a level of psychological well-being or an absence of mental illness. It's the psychological state of someone who is functioning at a satisfactory level of emotional and behavioral adjustment.

It includes subjective well-being, perceived self-efficacy, autonomy, competence, intergenerational dependence, and self-actualization of one's intellectual and emotional potential, among others.

This list compiles several self-help resources we've personally found useful for a range of mental health problems, but in no way are they a replacement of professional help, psychotherapy or pharmacotherapy. We're not experts, and

even if we were, most of these tools are meant as an aid to therapy, not as a substitute.

SOFTWARE AND HARDWARE REQUIREMENTS

- VS Code
- Oracle 8i
- 512 MB Ram
- Window 10

IMPLEMENTATION

Java script is a scripting language used to enhance the functionality of the browser. Java script is integrated with HTML and navigator 2.02. Java script facilitates the developer with properties related to document windows, frames, loaded documents and link. The J2EE platform specifies the logical application components within a system and defines the role played in the development process.

The J2EE platform uses a distributed multitiered application model for enterprise applications.

Java Server Pages (JSP) is a technology based on the Java language and

enables the development of dynamic web sites. JSP was developed by Sun Microsystems to allow server side development. JSP files are HTML files with special Tags containing Java source code that provide the dynamic content.
